INTRODUCTION

SKY ERP GST PLUS is a comprehensive Inventory management & GST compliance software developed by Everex Infotech.

It enables organizations to **ensure GST compliance, manage inventory, process orders, plan material resourcing and track job work**, seamlessly.

The software helps businesses streamline their operations from **purchase to sales**, including GST returns.

- ✓ Ensure GST Compliance
- ✓ Streamline Financial Processes
- ✓ Improve Operational Efficiency
- ✓ Enhance Data Accuracy
- ✓ Enable Informed Decision-Making
- ✓ Optimize Resource Utilization
- ✓ Improve Collaboration Across Departments
- ✓ Scalable for Business Growth

CHALLENGES + SOLUTIONS

	Challenges	Solutions
GST Compliance Management	Keeping up with frequent tax updates and filing returns accurately	Automate tax calculations, return filing, and compliance reports to avoid penalties
Inventory Management & Tracking	Difficulty in tracking real-time stock levels, leading to overstock or stockouts	Real-time inventory tracking, alerts for low stock, & purchase order management
Order Processing Efficiency	Manual processing of orders can lead to delays and errors.	Automated sales & purchase order speeds up order fulfilment and reduces errors
Managing Job Work Outsourcing	Complex tracking of material sent for job work orders with external vendors	Job work management tools track order progress, completion, and materials used
Document Handling & Compliance	Losing important documents and failing to adhere to compliance requirements.	Centralized document storage & easy retrieval ensures compliance
Financial Reporting & Accounting	Inconsistent financial data leads to mismanagement of cash flow & profit-loss reports	Integrated financial accounting system provides accurate financial reports, tax filings, and ledger management

CHALLENGES + SOLUTIONS

	Challenges	Solutions
Inconsistent Data across Departments	Inconsistent & outdated information across different departments	Ensure all departments access the same information, improving collaboration
Time Consuming Manual Data Entry	Manual data entry for transactions is time-consuming & prone to human error.	Automate data entry, reducing manual errors and saving time.
Difficulty in Tracking Material Usage	Unmonitored material usage can be complex & lead to wastage or shortages	Track material usage at each stage, helping businesses monitor consumption
Lack of Detailed Reporting	Standard reports make it hard to get insights for decision-making.	Offers detailed reports, so businesses can generate insights based on real-time data.
Delays in GST Return Filing	Late or incorrect GST return filing can lead to penalties and compliance issues.	Automated GST return filing reminders ensure timely & accurate filing
Complex Financial Reconciliation	Reconciling financial transactions can be challenging and error-prone	Seamless reconciliation features, integrating payments, taxes, and ledgers for accurate financial reporting

SKY ERP GST PLUS

FEATURES

Web/Browser-Based Application

Access the software from anywhere using any device with internet connectivity, providing flexibility and remote access for users. Also, host the application on premises or on cloud server.

Digital Signature Integration

Secure documents and transactions with integrated digital signatures for authentication, enhancing security and compliance.

Maker Checker (Multi-Level) Approval System

Multi-level approval workflows ensure accountability, allowing different user roles to review and approve transactions or documents before finalizing.

Single Entry System

Simplifies data entry with a single-entry mechanism that reduces duplication and errors, making processes faster and more efficient.

User Defined Field Creation

Customize the software by creating user-defined fields to capture specific information based on business requirements.

MRP (Price) Based Calculation

Automatic calculations based on the Maximum Retail Price (MRP), ensuring accurate pricing and taxation for products.

Amortization Rate Calculation

Integrated amortization functionality helps calculate the gradual reduction of asset value or loan payments over time, ensuring precise financial tracking.

Document Management

Centralized storage for all business documents with easy access, version control, and backup, ensuring organized document handling and compliance.

HSN Code/Chapter-Wise Auto Tax/Duty Control

Automatically applies correct tax rates based on the HSN (Harmonized System of Nomenclature) code, streamlining GST and duty calculations.

User-Wise Access Rights with Log Management

Assign user-specific roles and permissions with detailed log management to track changes and maintain security and control over sensitive data

VAT Invoice & Consignment Note

Manage VAT-compliant invoices and consignment notes manually or via web API, ensuring seamless tax-regulation adherence & statutory accuracy.

Multiple Units of Measurement

Supports multiple units of measurement (e.g., weight, volume, length) for inventory management, ensuring accuracy in transactions & reporting.

Barcode & QR Code Integration/Recognition

Integrate barcode and QR code scanning for faster product identification, inventory tracking, and streamlined order processing.

Document & Report Generation in PDF

Generate reports and documents in PDF format and export data seamlessly to MS Word and MS Excel for further editing or sharing.

Inventory Management (Process-Wise with Multi-UOM)

Manage inventory at each process level (purchase, production) with support for multiple units of measurement, ensuring accuracy and control.

Material Resource Planning

Plan production and procurement efficiently based on demand forecasting, raw material availability, and lead times, reducing delays and stockouts.

Bill of Material

Create and manage detailed Bills of Material for manufacturing processes, linking raw materials, semi-finished, and finished goods for accurate cost and production tracking.

Inventory Management Lot No. & Batch No. Wise

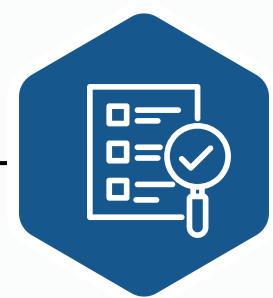

Track inventory at lot and batch level, enabling detailed analysis of product performance, wastage control, and cost optimization.

KEY FUNCTIONALITIES

Order Processing

Order Processing module streamlines sales & purchase cycles by automating quotations, orders, invoices, & GST integration for faster & error-free transactions.

Quality Control

Quality Control module ensures defect-free operations with user-defined inspections, real-time reporting, & automated alerts for non-conformance at every stage of material handling.

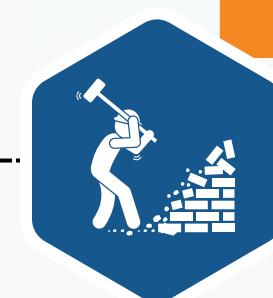

Material Resource Planning

Material Resource Planning module optimizes production and procurement by forecasting demand, scheduling resources, and aligning materials with Bill of Material for timely delivery.

Inventory Management

Inventory Management module provides real-time stock visibility, process-wise control, & lot/batch tracking to ensure accuracy, efficiency, & profitability.

Job Work Management

Tracks external job orders, monitors material usage, & ensures timely completion with automated reporting & GST compliance

Financial Accounting

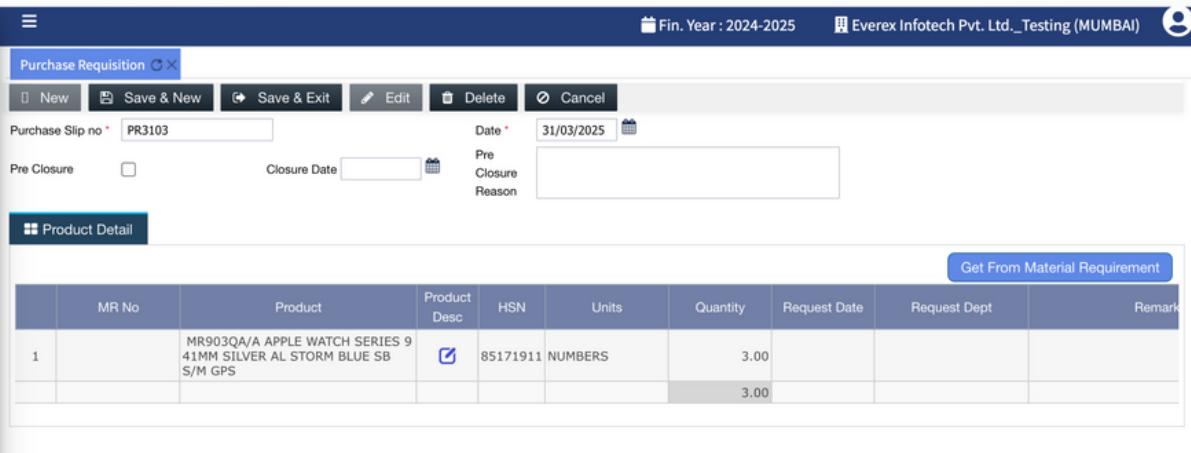

Automates GST-compliant bookkeeping, reconciliation, & financial reporting, insights for smarter business decisions.

Document Management

Centralizes digital storage, enables role-based access, & ensures secure, organized, and easily retrievable business documents.

Multi-Level Inspection

Multi-level inspection (material inward, production, job work)

MATERIAL RESOURCE PLANNING

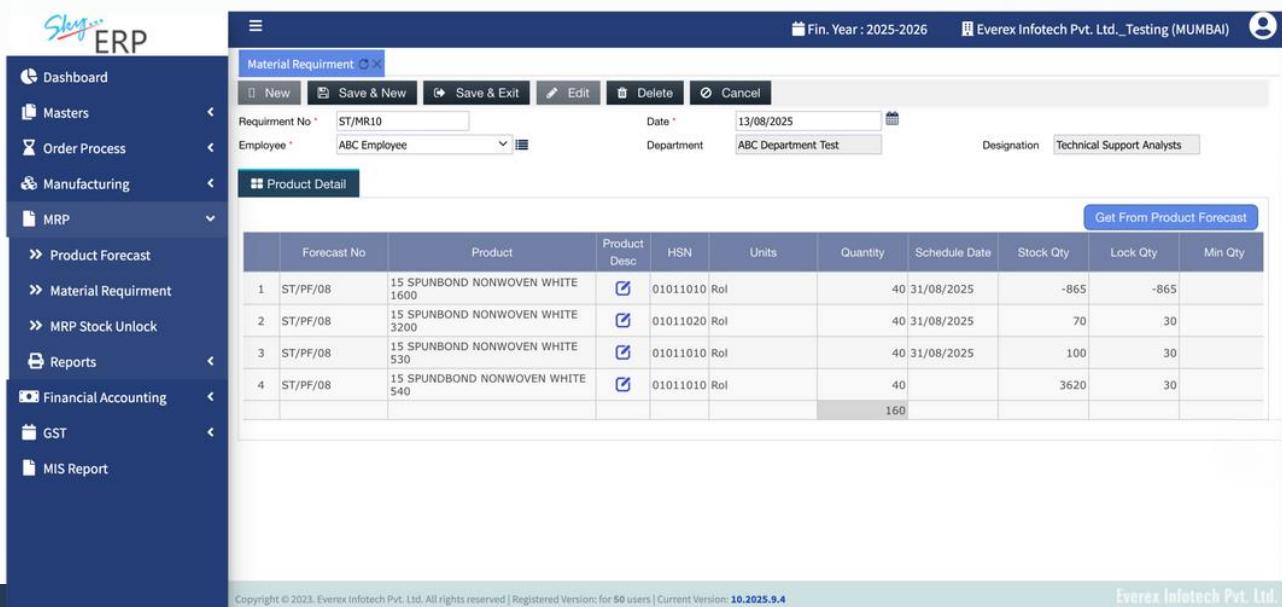

> Forecast Demand

Forecast demand and align raw material procurement

> Bill of Material

Integrated with BOM (Bill of Material) for accuracy

> Optimize Resources

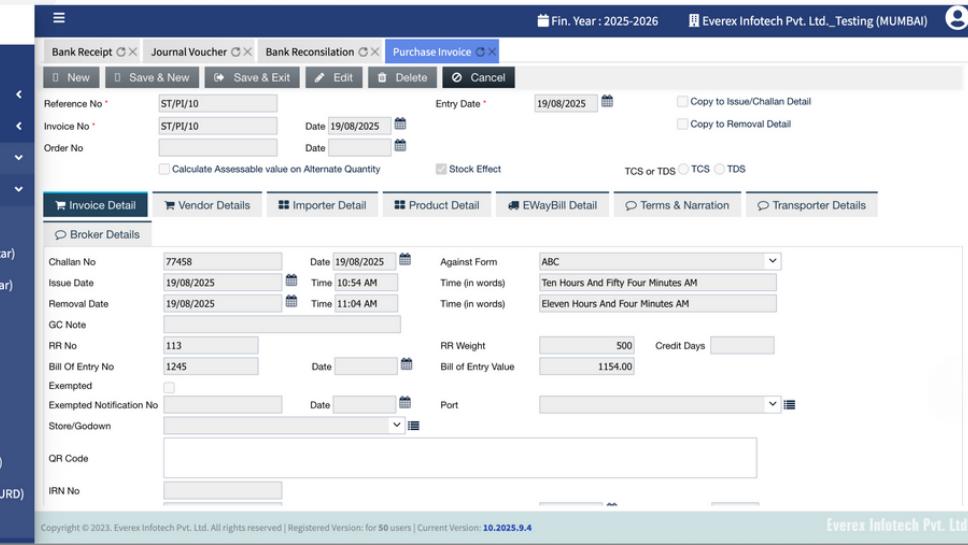

Optimize resources to reduce delays & stockouts

> Cost Control

Cost control through efficient resource allocation and wastage reduction

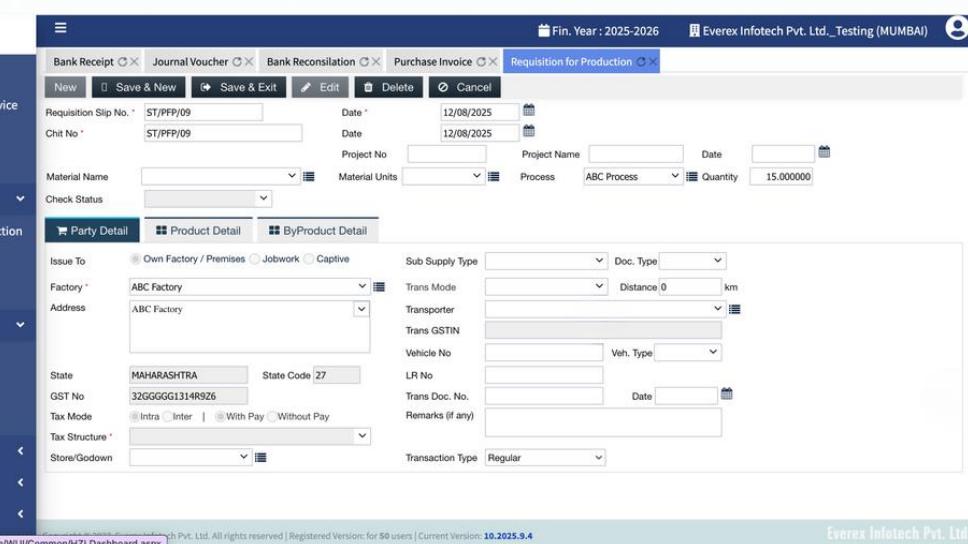

Material Resource Planning module optimizes production and procurement by forecasting demand, scheduling resources, and aligning materials with Bill of Material for timely delivery.

INVENTORY MANAGEMENT

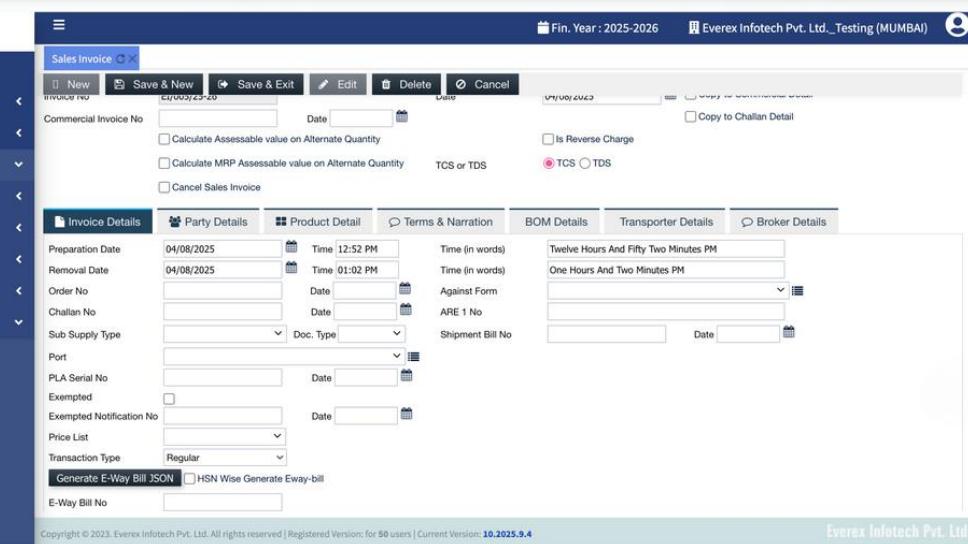

Stock Register

Stock register across multiple locations for complete visibility

Multiple Godown Register

Multiple godown register for accurate warehouse-level inventory

Process-Wise Inventory

Process-wise inventory control with multiple units of measurement

- Job work wise
- In house Production wise

Inventory Management module provides real-time stock visibility, process-wise control, and lot/batch tracking to ensure accuracy, efficiency, and profitability.

Stock Alerts

Real-time stock alerts to prevent shortages

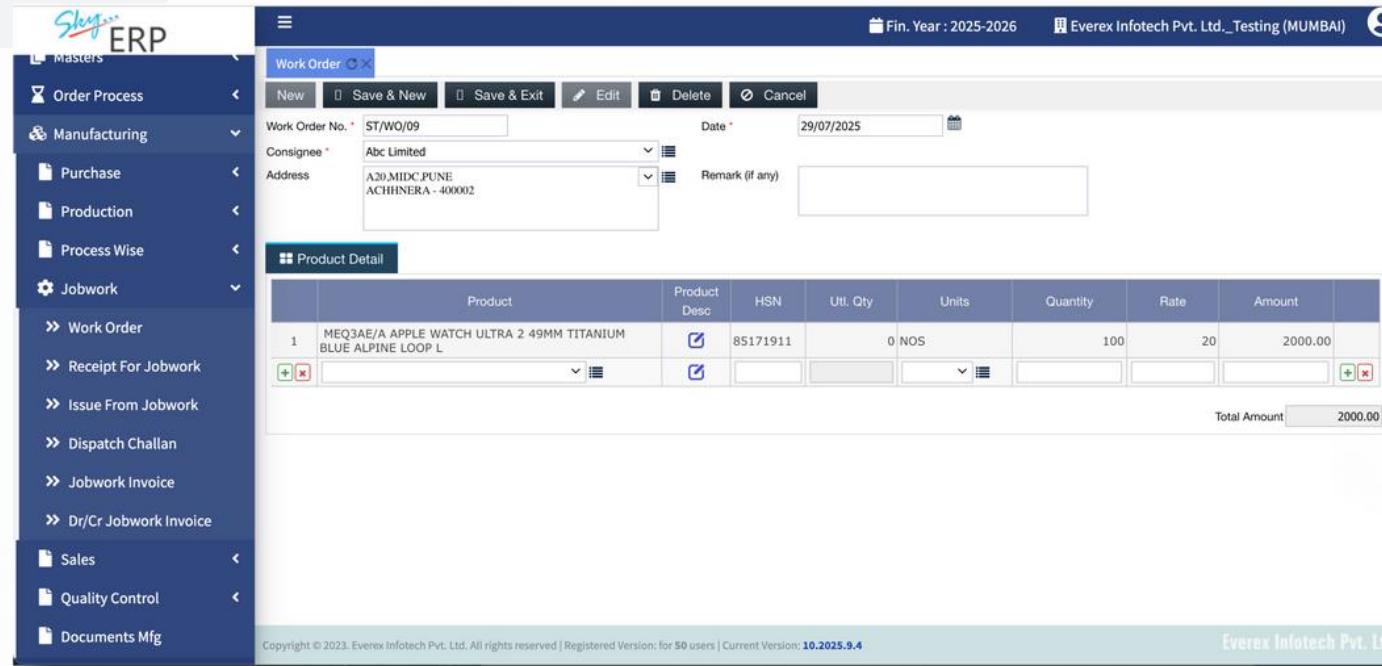

Lot & Batch Wise Inventory

Generate lot-wise & batch-wise inventory details

Order Integration

Comprehensive work order for purchase & sales order integration

Automated journal entries linked with transactions

Financial Reporting

Financial reports: Profit & Loss, Balance Sheet, Cash Flow, Ageing, Outstanding, Graphical Reports

Ledgers

Trial balance, general ledger, and subsidiary ledgers

Compliance

Tax filing, billing and audit-ready compliance

CASE STUDY 1

STREAMLINING GST COMPLIANCE FOR A MANUFACTURING SME

● Client Profile

A mid-sized auto parts manufacturer with operations in multiple states, managing over 200 monthly invoices and frequent interstate transactions.

● Challenges

- Manual GST filing leading to errors and penalties.
- Difficulty in reconciling purchase invoices with supplier GST filings.
- Delays in generating e-invoices and e-way bills.

● Solution

- Automated GST return filing with real-time reconciliation.
- Integrated e-invoicing and e-way bill generation.
- Centralized dashboard for compliance monitoring.

● Results

- 100% error-free GST filings for 6 consecutive quarters.
- Saved 40+ man-hours per month previously spent on manual compliance.
- Improved cash flow visibility with accurate tax credit tracking.

CASE STUDY 2

ENHANCING QUALITY CONTROL & REPORTING FOR A PHARMA COMPANY

● Client Profile

A pharmaceutical company supplying across India, requiring strict quality checks and compliance with GST regulations.

● Challenges

- Lack of structured quality control during GRN (Goods Receipt Note) stage.
- Inconsistent reporting and delays in identifying defective material.
- Difficulty in tracking GST credit due to mismatched entries.

● Solution

- User-defined quality control templates at GRN and material inward stage.
- Automated quality reporting integrated with GST records.
- Instant alerts for mismatched entries and rejected materials.
- Lot-wise & batch-wise inventory management for detailed tracking.
- Process-wise inventory management for work in production.

● Results

- Reduced defective material usage by 25%.
- Faster decision-making with real-time quality & GST reports.
- Compliance accuracy increased, eliminating GST credit mismatches.
