Telephone Monitoring and Management Software

TELECHECK is a PC based call monitoring system, adds utility to your customer by capturing and managing outgoing telephone calls data. It speedily provides information every minute with accurate call data information and analysis of calls made thus helping them to control their monthly call expenses. The software can work with any EPABX / KTS having SMDR output and can be ideal for any to every organization having any no. of P&T lines and the any no of extensions.

Tele Check is used by corporate, government Institutions, call centers, etc. who want to analyze and control Telephone Expense

This is an innovative solution for analyzing the telephone calls made and maintaining the officialdom by ensuring that personal calls are kept in check at the workplace. Thus it monitors the call volume and provides control over unnecessary phone calls thus saving on the call charges.

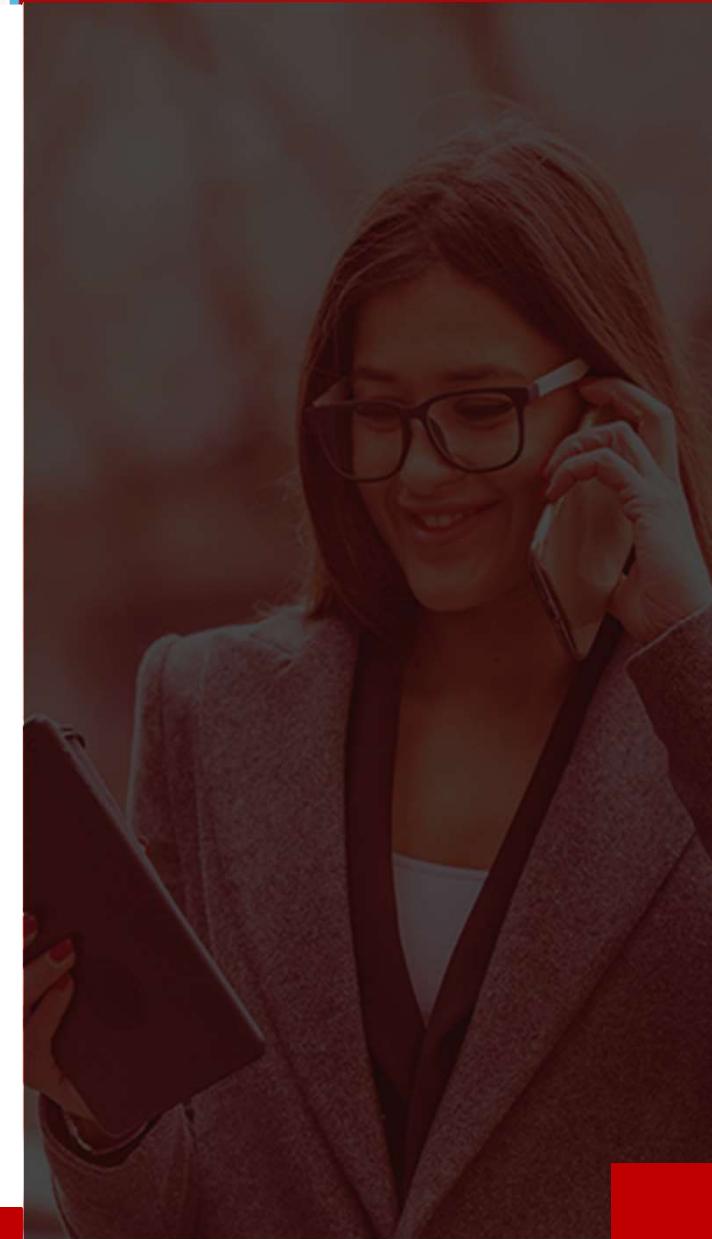

Telephone Monitoring and Management Software

TELECHECK is an easy-to-use business productivity and management tool , providing call accounting. This software works with any telephone system that provides SMDR/CDR (Call Detail Record) information, helping you make valuable use of data already available to you through your telephone system.

TELECHECK stores the call record information from your phone system, and lets you recall it in your choice of report formats, providing you with important information to help you manage your business better by cross checking calls and cutting unnecessary call expenses.

TELECHECK produces reports on demand or on an automated schedule as set per requirement by the user. All reports can be viewed on the computer's screen, saved to your hard drive, e-mailed or viewed on the web.

This makes storage and retrieval of previous and old call information easier and facilitates search and retrieval of the information faster too.

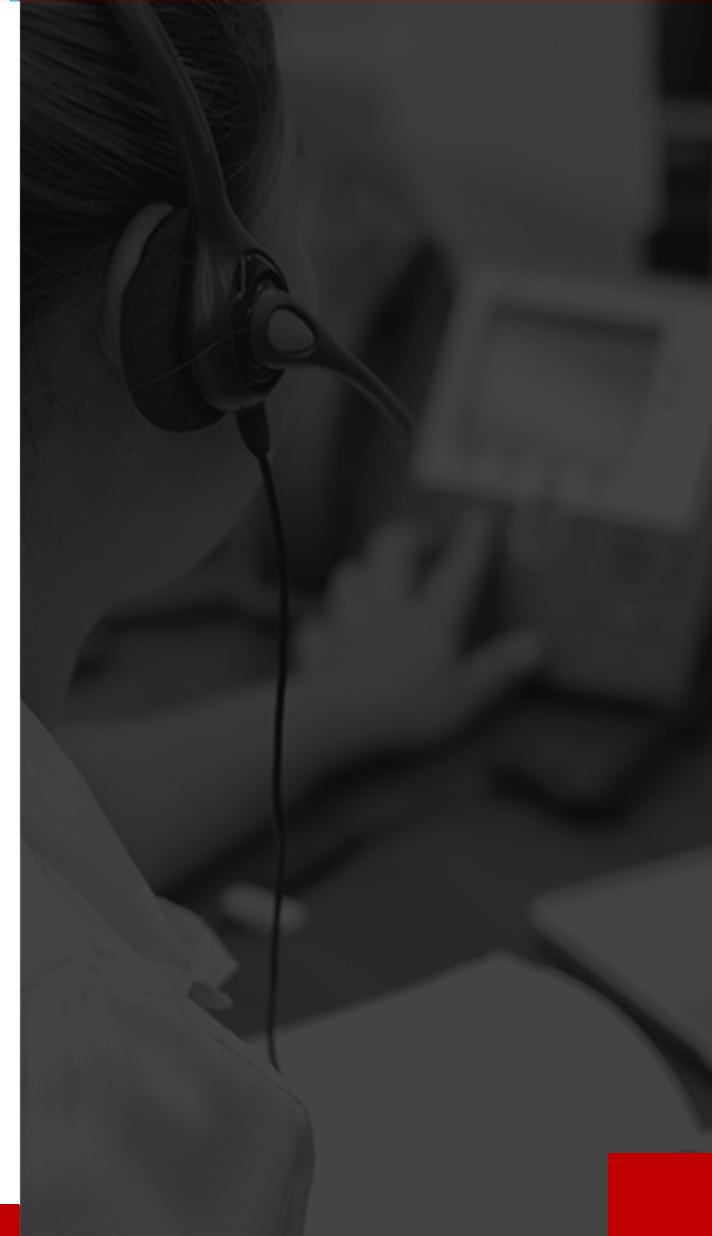

Telephone Monitoring and Management Software

Functionality Features

Telecheck provides a multitude of reports but the major reports that are frequently requested include:

- ❖ Longest calls by extension
- ❖ Most expensive calls by extension

Market Potentials

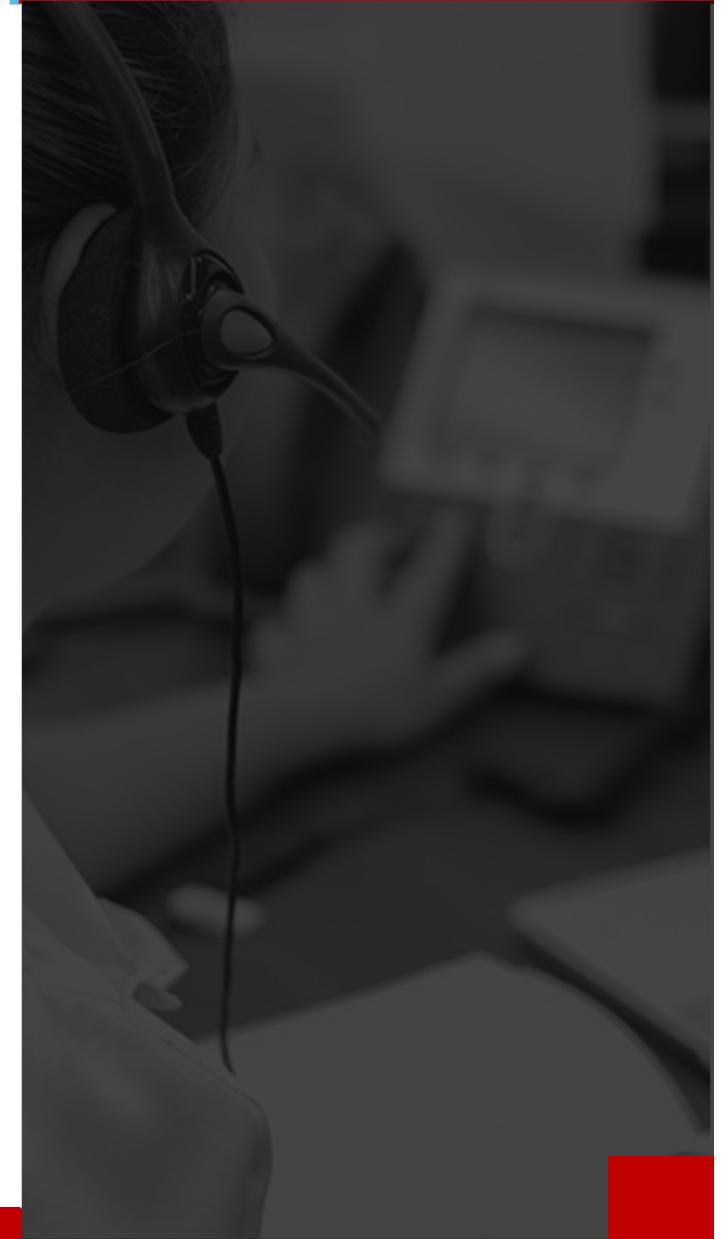

- ❖ Hospitality
- ❖ Professional Businesses
- ❖ Large Organizations
- ❖ Medical and Dental Offices
- ❖ Convention Centers
- ❖ Cities and Government Authorities
- ❖ Educational Facilities
- ❖ Hospitals
- ❖ Car Dealerships
- ❖ Multi-Tenant Organizations
- ❖ Media Outlets

Telephone Monitoring and Management Software

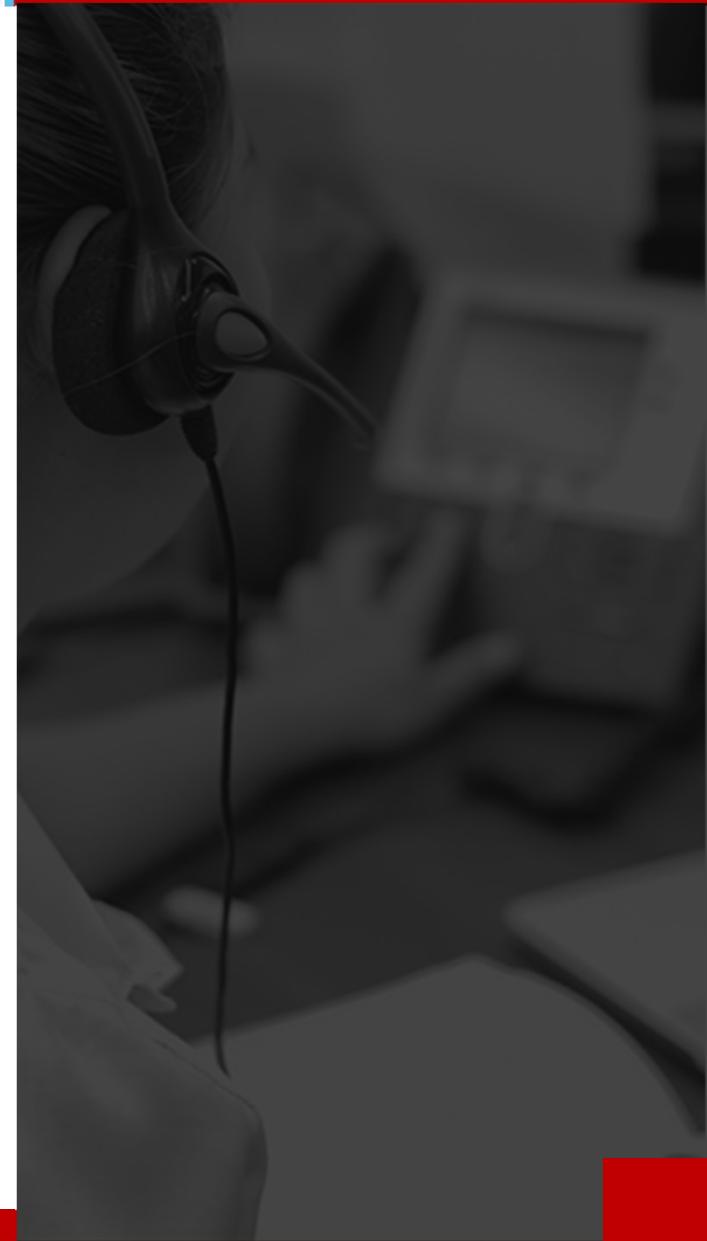

Hospitality

- ❖ Call accounting systems in hospitality provide more sophisticated chargeback and markup algorithms for revenue based resale of phone services to targeted visitors, staff, partners, and guests.
- ❖ Traditionally, hotel chains and management companies have suggested that properties keep their call accounting systems up-to-date and accurate. They have done this for following reasons:
 - To recover the cost of long-distance calls,
 - To properly allocate, account for, and charge customers for their phone usage,
 - To generate revenue through the resale of phone calls, and
 - To track phone calls made to and from their property for marketing, planning and other purposes.

Large Organizations

- ❖ Large organizations, and businesses of all sizes, can use call accounting software to improve employee productivity, charge for phone usage, and optimize telephone network performance.
- ❖ The following items are just a few of the many benefits provided by call accounting software:
 - Collect call data from single or multiple locations and/or PBXs;
 - Monitor employee phone activity;
 - Track incoming/outgoing phone calls;
 - Identify phone abuse and toll fraud;
 - Charge or bill clients for phone time;
 - Identify threatening or harassing callers;
 - Alert staff when emergency calls (911) are made;
 - Schedule daily, weekly, or monthly reports;
 - Email different reports to different managers;
 - Allocate telecom expenses by department, division, or account code;
 - Monitor employee activity across multiple departments;
 - Establish internal controls to comply with government regulations.

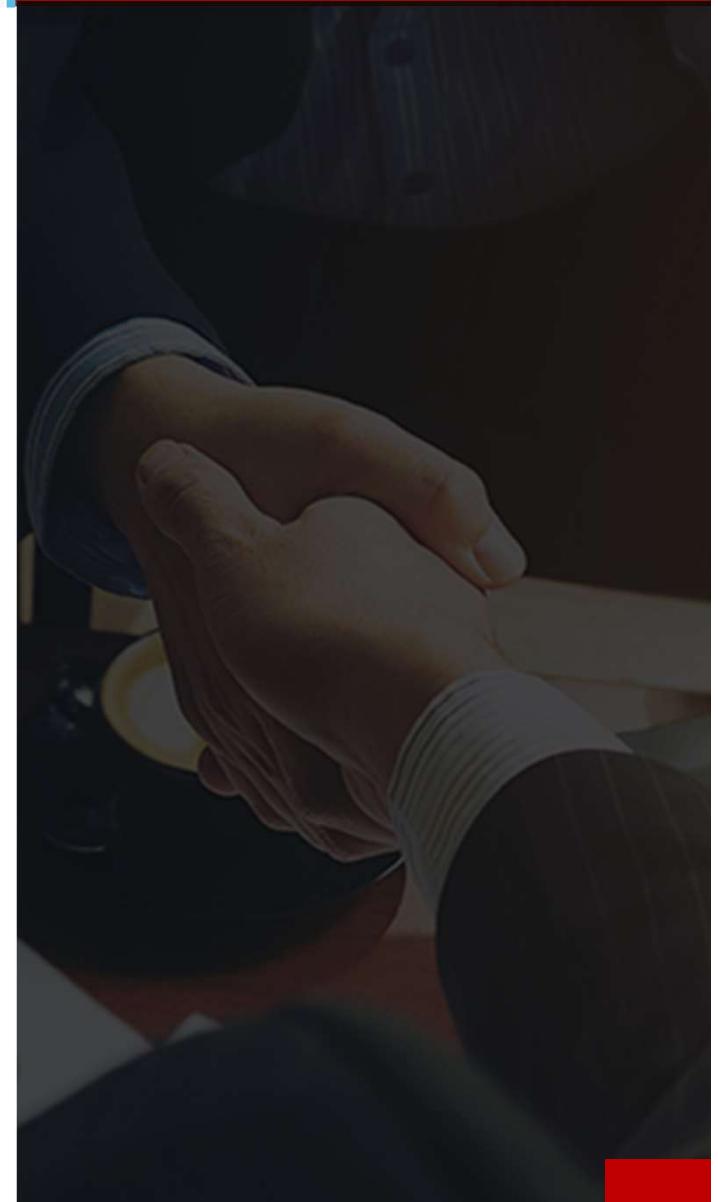

Telephone Monitoring and Management Software

Convention Centers

- ❖ Allocate Toll Calls and Equipment Costs by Department, Station or Location
- ❖ Recover Telecommunication Costs From Tenants
- ❖ Detect Misuse and Abuse
- ❖ Provide Emergency and/or Custom Alert Notification
- ❖ Generate Revenue with Flexible Surcharge Capabilities
- ❖ Monitor Trunk Activity to Analyze Line Requirements

Media Outlets

- ❖ Allocate Equipment Charges to Various Departments and Divisions
- ❖ Allocate Telecommunication Costs for Budgeting Purposes
- ❖ Effective Cost Recovery Using PIN Numbers
- ❖ Detecting Misuse and Abuse
- ❖ Provide Emergency and/or Custom Alert Notification

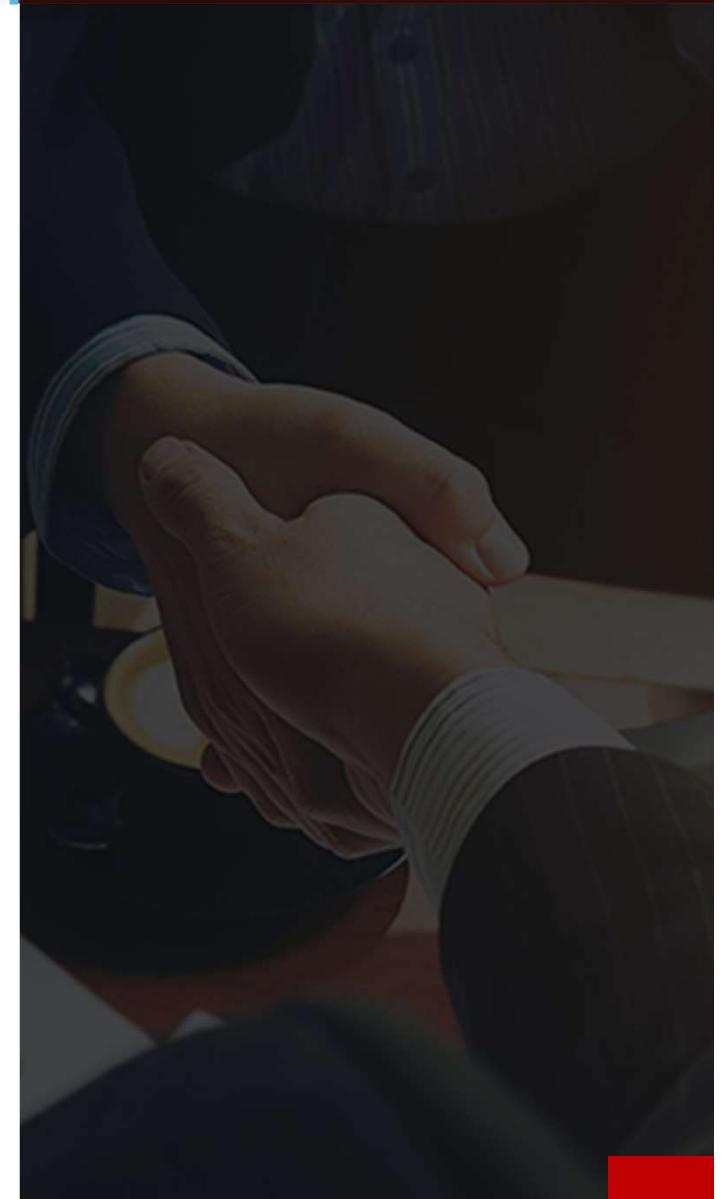

Telephone Monitoring and Management Software

Educational Facilities

- ❖ Allocate Costs for Budgeting Purposes
- ❖ Recover Telephone Costs
- ❖ Detect Misuse and Abuse
- ❖ Provide Emergency and/or Custom Alert Notification
- ❖ Generate Revenue with Flexible Surcharge Capabilities

Car Dealerships

- ❖ Allocate Telecommunication Costs by Extension or Department
- ❖ Recover Telephone Costs
- ❖ Detect Misuse and Abuse
- ❖ Provide Emergency and/or Custom Alert Notification
